

Priyanshu Birla

Haryana, India | +91 9588784742 | priyanshubirla02@gmail.com | GitHub: Priyanshu Birla: - [LINK](#)

Profile

Backend Developer skilled in Java, Spring Boot, RESTful API development, microservices architecture, JWT authentication, and relational databases (MySQL/PostgreSQL). Experienced in Docker-based deployments, Azure cloud services, and writing unit tests using JUnit.

Experience

Backend Developer Intern

Affine | Dec 2025- Present

- Built and deployed a Spring Boot-based Hotel Booking REST API with modules for hotels, rooms, bookings, and reviews using Java 17, Spring Data JPA, and MySQL.
- Implemented JWT-based authentication, role-based authorization using Spring Security and Api rate limiting.
- Integrated Redis caching to optimize frequently accessed hotel and room data.
- Configured CI/CD pipelines using Jenkins to automate build, testing, and deployment of the application.
- Implemented monitoring and observability using Spring Boot Actuator, Micrometer, and Prometheus metrics.
- Designed a layered architecture (Controller–Service–Repository–DTO) with global exception handling and API documentation using Swagger/OpenAPI.

Software Engineer Intern

Walnut Health | June 2025-Sep 2025

- Integrated secure payment gateway REST APIs within a Spring Boot, ensuring transactional integrity and authentication compliance.
- Performed comprehensive API testing using Postman, validating request/response cycles and automating payment workflow scenarios.
- Developed a real-time notification module using Firebase Cloud Messaging (FCM) to deliver event-driven alerts across the platform.
- Utilized HashiCorp Vault for secure secret management, encrypting API keys and sensitive configuration data.
- Deployed and managed backend services on Microsoft Azure cloud infrastructure, supporting scalable and production-ready applications.

Backend Developer Intern

Satya Sys | Apr 2025- Jun 2025

- Built a Spring Boot microservice integrated with Sarvam.ai REST APIs for real-time English–Kannada translation with speech support, implementing structured layers, validation, and exception handling.
- Documented RESTful API endpoints using Swagger/OpenAPI for interactive API documentation and improved backend collaboration.
- Managed source control using Git & GitHub, following branching strategies and issue tracking for collaborative development workflows.
- Containerized the application using Docker, enabling consistent builds and deployment across development, staging, and production environments.
- Integrated Gemini AI with database-driven logic to match user queries using optimized queries (JPA/Hibernate), enabling accurate and context-aware responses.

Projects

Nestays – Accommodation Platform for Students & Professionals | [LINK](#)

A web platform for students and professionals to find PGs and accommodation using an interactive map. Attracted 350+ users in the first month. Handled full-stack development, marketing, and user growth. Managed a small team for platform design, user support, and daily operations.

Vaidya – Microservices-based Secure Healthcare Platform | [LINK](#)

Built to help doctors manage appointments, prescriptions, and patient records, while admins use a dedicated UMS for user oversight. Developed with Spring Boot, Spring Security (JWT), MySQL, Vault for Secrets, Redis for Caching, Swagger for API docs, SLF4J for logging, and JUnit for testing. Containerized with Docker, monitored with Grafana, and deployed on Render. Vaidya Frontend LINK created in React.js. Vaidya is designed with microservices architecture.

Education

B.Tech – Computer Science & Engineering

J.C. Bose University of Science and Technology, YMCA, Faridabad
(2022–2026)

Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), OS, DBMS

Technical Skills

Languages: Java

Frameworks: Spring Boot, Spring Security, JPA/Hibernate

Databases: MySQL, PostgreSQL, Redis

API & Testing: RESTful APIs, Swagger, Postman, JUnit

DevOps & Cloud: Docker, Azure, Render, CI/CD, Jenkins

Tools: Git, Vault, Grafana, SLF4J

Achievements

- Top 10 team at HackArcode for innovative project work
- Selected for Smart India Hackathon (SIH) for technical excellence
- Organized a hackathon at DTU during E-Summit 2025, bringing together innovative student teams.
